

PTFE Flexible Lantern Ring Material

PTFE Flexible Lantern ring is made of 100% Virgin PTFE , designed to perform like traditional lantern rings yet easier to install and remove. Flexible 100% PTFE Lantern rings are used in applications widely where outside lubrication is necessary in order to keep packing lubricated, cool and flushed of abrasives and chemicals. It increases the life of compression packing greatly, resulting in less

maintenance and downtime over the life of the equipment. PTFE flexible lantern ring material is perfect for temperatures to 260°C (550°F) and pH 0 to 14.

Service Rating for PTFE Flexible Lantern Ring Material

- Max Temperature: 260°C (550°F)
- PH Range: 0 ~ 14

PTFE Flexible Lantern Ring Material Key Benefits

- Lower Inventory costs because one roll can be cut to length to fit any shaft size.
- Speeds up repacking because it is flexible enough to be removed easily.
- Eliminates stock of many materials - PTFE material offers chemical resistance in a broad range of applications.
- Easily cut with knife or saw
